

## Prompt muons

Pascal Gutjahr

April 9, 2024

**Muons**

Source: NASA

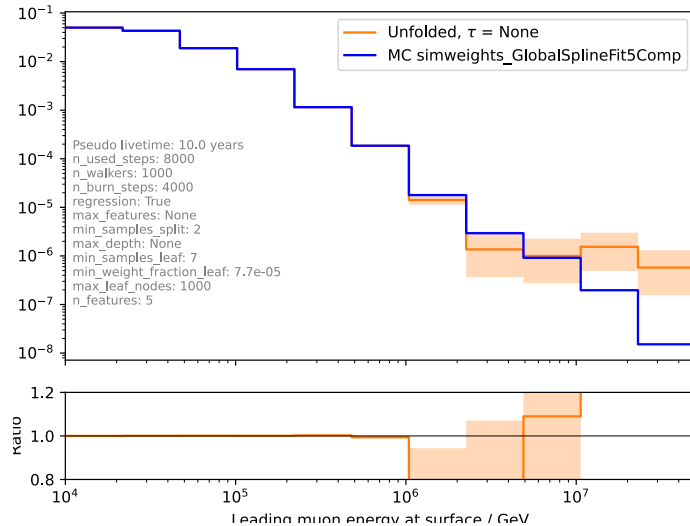

## Unfolding – only energy proxy

old plot – binning too large

# Unfolding – tree binning

overshoots at high energies

- too little statistics?

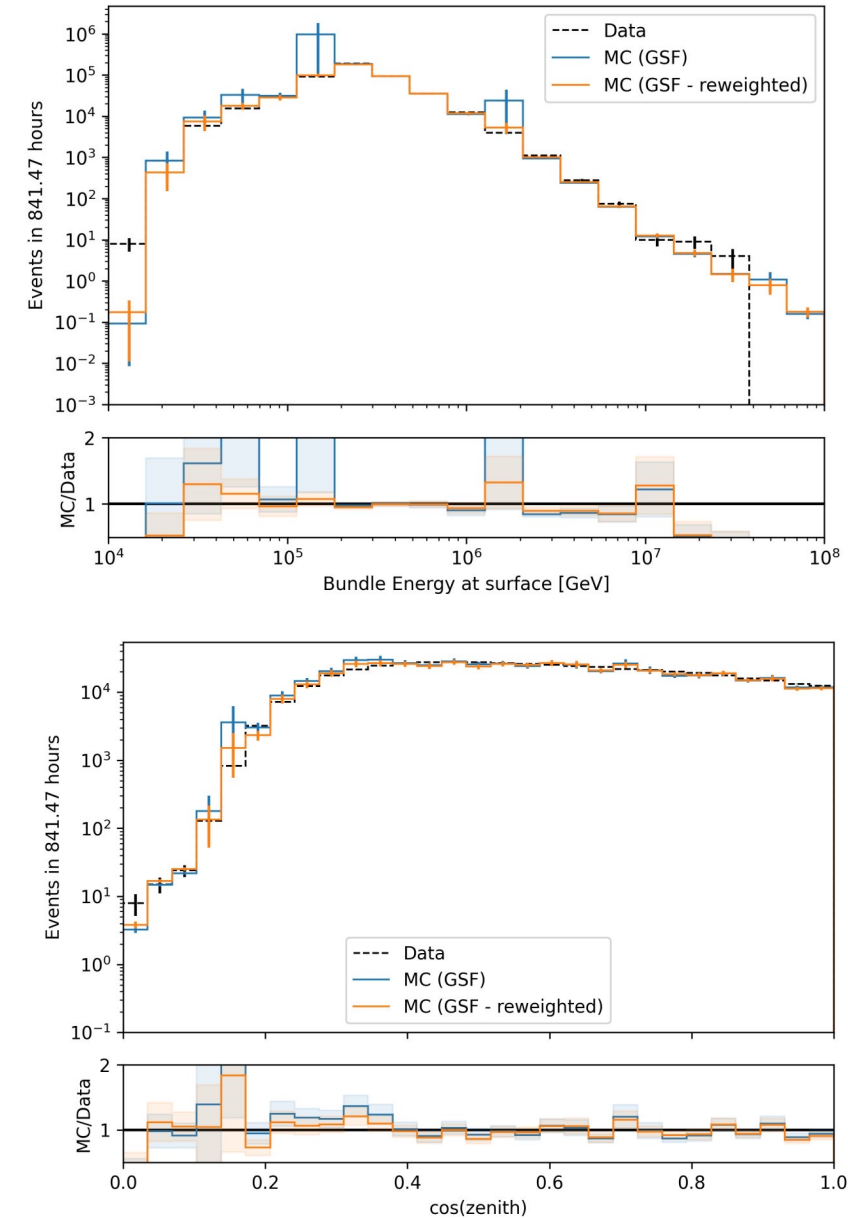

Next steps

- plot binning

## Data-MC: z-mismatch

- re-weight z-position
- fixes z-mismatch
  - no impact on energy/zenith (small improvement)

# Simulation

## Dataset Summary

<a href="#">22702</a>	mhuennefeld (users)	ERRORS
Test dataset to for CORSIKA EHISTORY simulation (1e9 GeV - 1e10 GeV)		
<a href="#">22701</a>	mhuennefeld (users)	COMPLETE
Test dataset to for CORSIKA EHISTORY simulation (1e8 GeV - 1e9 GeV)		
<a href="#">22700</a>	mhuennefeld (users)	PROCESSING
Test dataset to for CORSIKA EHISTORY simulation (1e6 GeV - 1e8 GeV)		
<a href="#">22699</a>	mhuennefeld (users)	ERRORS
Test dataset to for CORSIKA EHISTORY simulation (5e2 GeV - 1e6 GeV)		

started first iceprod tests

- investigate errors
- check configs for latest recommendations / software / settings
- Polytopia: MuonGun vs CORSIKA ?

## Misc / ToDos

- Investigate decision tree binning
- Investigate iceprod errors
- Check produced iceprod datasets
- Analyze impact of CORSIKA as polyploia
- Finalize configs
- Estimate muon multiplicity for neutrino datasets using DNN (asked by Dave)
- Compare multiplicity charm/unflavored (asked by Lu)
- Train DNN to estimate neutrino energy (ESTES)?

LBL Meetings: Google drive to store meeting slides?
